10. New sources of energy are considered as power alternatives such as .....

**Summary Making (8 Marks )**

Throughout the ages , man has learned more about fire , how to control it and how to use it in many ways . We can only guess how man learned that a fire was useful and what uses he made of it .By taking a burning stick from fire which had been started by nature , he could make a fire at his own " home " or cave . He could keep the fire burning by adding more dry grass , leaves and wood . The fire served the purpose of frightening animals away. Then , he discovered by accident that meat roasted in front of a fire tasted better and would keep longer without going bad . Again , he found how fire could be used for cooking and then for making certain metals .
